

AKASH RAMESH

FULLSTACK DEVELOPER

Email: hello@akashramesh.in Phone: +91 9003071134 LinkedIn: [akashramesh1999](https://www.linkedin.com/in/akashramesh1999) Website: akashramesh.in

SUMMARY

Full Stack Developer with 6+ years of experience building cloud-native applications and distributed systems using Node.js and Java. Experienced in developing LLM-powered database automation and task-specific AI agents with Amazon Bedrock for query validation, approval workflows, access control, and controlled database changes. Built event-driven systems processing 50K+ messages per day and services handling 10M+ API requests per month. Strong background in AWS, Kubernetes, database optimization, and CI/CD.

WORK EXPERIENCE

Platform Engineer

ADP India Pvt. Ltd.

Feb 2022 – Present *Chennai, India*

- Built a Webex bot to execute database change tickets after validating JIRA approvals and user access.
- Developed Amazon Bedrock agents for stored procedure validation, manifest generation, approval checks, access control, user assistance, and prompt injection protection.
- Built stored procedure execution flows with pre-execution checks, backups, post-execution validation, and rollback support across multiple shards and clusters.
- Added direct DML execution using persistent database connections, allowing users to review post-execution checks and commit or roll back changes from Webex.
- Moved background processing to AWS SQS, handling 50K+ messages per day and reducing work performed during API requests.
- Built a WebSocket-based log viewer to stream CloudWatch logs, with React Window for large log sets and Amazon S3 for archival.

Junior Software Engineer

Cognizant

Jul 2020 – Feb 2022 *Chennai, India*

- Built Spring Boot and Node.js microservices handling 10M+ API requests per month.
- Developed React interfaces and integrated frontend flows with REST APIs backed by Java services.
- Designed and optimized REST APIs, reducing response times by 20%.
- Wrote Jest and JUnit tests for frontend and backend services.
- Integrated application builds and deployments with CI/CD pipelines; reported bug volume fell by 50%.

EDUCATION

B Tech (Computer Science and Engineering)

SRM Institute of Science and Technology, Chennai, India

Jun 2016 – May 2020

GPA: 8.36 - First class with distinction

AISSCE - DAV Boys Senior Secondary School, Gopalapuram

Apr 2015 – May 2016

Group: Science with Computer Science

SKILLS

- Programming: JavaScript, TypeScript, Java, Python.
- Databases: MySQL, MongoDB, PostgreSQL, Redis.
- Framework:
 - Backend: Node.js, Express.js, Spring Boot, Spring Batch, Django.
 - Frontend: React.js (Redux, Hooks).
- Tools: Redash, Grafana, Datadog, Splunk, Git, Jenkins.
- Cloud and Infrastructure: AWS, SQS, Lambda, EC2, RDS, Amazon Bedrock, Docker, Kubernetes.

PERSONAL PROJECTS

Pixel Pursuit – Blogging Platform

- Built a blogging platform with React, TypeScript, Redux, Spring Boot, and MongoDB.
- Added rich-text editing, image uploads, tagging, content previews, JWT, and OAuth2 authentication.
- Added server-side caching and asynchronous processing to reduce repeated API work.
- Hosted at blog.akashramesh.in.

Expensify – Expense Tracker

- Built an expense tracking application with React.js, Firebase, and Node.js with real-time data updates.
- Added OAuth2 authentication through Firebase Authentication.
- Hosted at expensify.akashramesh.in.

CERTIFICATIONS

AWS Certified Cloud Practitioner

Nov 2021 – Nov 2024

Credential ID: VWWP99BLGB4Q1R55
